

Contract Logo use verifiers/validators, LCA-experts, TAC members and cooperation partners

between

the company XY, represented by person(s) XY/person XY

hereinafter also referred to as logon user(s)

and

Bau EPD GmbH as programme operator for EPDs in accordance with EN 15804 and ISO 14025

This agreement governs the use of the Bau EPD GmbH logo by approved verifiers/validators and LCA-experts who are approved by the PCR committee, as well as by advisory board members.

The use of the logo version WITHOUT the accreditation mark is permitted in accordance with M-Document-04a until revoked by Bau EPD GmbH.

The logo user(s) undertake(s) to immediately notify Bau EPD GmbH of the manner in which the logo is used (website links, email signatures, documents, etc.).

When using the logo, care must be taken to ensure that it is placed in a context that clearly indicates that this logo does NOT represent certification of institutions. While it may be referenced by verifiers/validators in the sense of personal certification, LCA-experts may only indicate that they are approved members of the PCR committee and offer EPD creation and consulting in accordance with the rules of Bau EPD GmbH.

If the logo is used in the course of a reference by verifiers/validators, it must not be placed in a context that could suggest that other persons from an institution who are not approved for verification/validation could also carry out verifications/validations for the Bau EPD GmbH programme.

When listing several EPD programme operators/certification bodies for which the logon users work, it must not be implied that working for one institution necessitates working for other institutions or that mutual recognition of EPDs without verification/validation by Bau EPD GmbH is established or possible.

Advisory board members may use the logo to indicate that they are members of the advisory board.

Cooperation and network partners may use the logo to indicate the nature of the cooperation and the networks.

The use of the ECO Platform logo is regulated in M-Document 04. This document was written by the ECO Platform and is anchored and distributed by Bau EPD GmbH for informational purposes. This document is binding for persons and
